DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/24/2004 has been entered.

Allowable Subject Matter

2. Claims 1-13 are allowed.

3. The following is an examiner's statement of reasons for allowance: The closest prior art references are Robinson et al (US 4,001,076) and Dugger (US 3,933,573). Robinson et al teaches producing a thin film with a graded composition through its thickness by slowly cooling the temperature of a growth solution (Abstract). Dugger teaches the degree of supersaturation can be changed by changing the solution temperature or by changing the pressure in the solution. The prior art does not teach or suggest compositionally grading an epitaxial layer by varying the pressure to change the degree of supersaturation during growth to affect the growth of the epitaxial layer.

Referring to claim 13, the closest prior art references are Cook (US 4,519,871) and Dugger (US 3,933,573). Cook teaches two different solutions are employed to form epitaxial layers of two different compositions on a substrate and cooling the solutions in order to develop

a condition of supersaturation (col 1, ln 20-65). Dugger teaches the degree of supersaturation can be changed by changing the solution temperature or by changing the pressure in the solution (col 3, ln 1-30). The cited prior art does not teach varying the pressure in the chamber between growth of the first epitaxial layer and the at least one further growth solution so as to change the degree of supersaturation of the at least one further growth solution to affect the growth of the at least one further epitaxial layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
